PROFESSIONAL SUMMARY

Semi Senior iOS Engineer with 6+ years of experience delivering scalable mobile applications across Banking, E-commerce, Audio Streaming, and Food-Tech domains. Expertise in Swift, SwiftUI, Combine, Redux, and Clean Architecture with a strong focus on application scalability, performance, security, and testability. Experienced in leading feature development, mentoring developers, driving architectural decisions, and collaborating with cross-functional teams in Agile environments.

TECHNICAL SKILLS

Languages & Frameworks	Swift, SwiftUI, Combine, UIKit, Realm, Core data, XCTest
Architecture Patterns	MVC, MVVM, Clean Architecture, Redux
Tools & Platforms	Xcode, Crashlytics, Google analytics, Git, JIRA, CocoaPods, SPM, jenkins
Other	REST API Integration, Unit Testing, UI testingCode Review, Agile / Scrum

PROFESSIONAL EXPERIENCE

Globant 2022 – Present

Software Engineer

HSBC – NorthStar

- Delivered 10+ production features using SwiftUI, Combine, and Redux for a digital banking application serving millions of customers, improving application stability and maintainability.
- Developed secure customer-facing banking features compliant with enterprise security and regulatory standards for a mobile application used by millions of customers.
- Coordinated security accreditation activities for plugin releases, addressing compliance findings and ensuring successful approval for deployment.
- Drive cross-functional collaboration with Product, QA, and Backend teams throughout the full Agile development lifecycle.
- Resolved production crashes and high-priority bugs, achieving~ 99% crash-free sessions. which resulted in a more stable application experience for users.
- Maintained unit and UI test coverage above 90% across the codebase using XCTest, ensuring high-quality code

Kayanee – Lifestyle & E-Commerce Platform

- Engineered intuitive customer-facing features spanning fashion, beauty, and wellness verticals, enhancing overall user engagement and retention.
- Integrated and optimized 20+ RESTful API endpoints, reducing response handling complexity and improving feature delivery speed.
- Established a unit testing culture, authoring comprehensive test suites that significantly improved release confidence and code reliability.
- Diagnosed and resolved critical production issues, reducing bug turnaround time and maintaining high application availability.
- Participated actively in code reviews and feature planning sessions, contributing technical insights to shape product direction.

Perennial Systems 2020 – 2022

Associate Developer

Awedio – Audio Streaming & Podcast Platform

- Designed and developed modular, reusable UI components to ensure visual consistency and accelerate feature delivery across the application.
- Integrated REST APIs for podcast feeds, live radio stations, enabling a rich and reliable listening experience.
- Built and optimized podcast download management and queue functionality, supporting offline playback and smooth user interactions.

- Spearheaded code reviews and refactoring initiatives, improving codebase readability, scalability, and long-term maintainability.
- Partnered closely with business stakeholders to translate requirements into precise, high-quality technical implementations.

WowInfotech 2019 – 2020

iOS Developer

Restrofast – Online Food Booking Platform

- Developed and maintained production-grade iOS features using Swift, enabling a seamless food discovery and reservation experience for end users.
- Integrated backend services and crafted responsive, pixel-perfect UI components that aligned with design specifications.
- Collaborated tightly with QA teams during testing and release cycles, ensuring thorough validation before each deployment.

EDUCATION

Bachelor of Engineering – Information Technology

Pune University | 2015
